3	2	4	7	5	6	1	9	8
5	1	8	2	9	3	6	4	7
6	7	9	8	4	1	5	2	3

Sudoku puzzles require you to find the missing numbers in a 9 by 9 grid, with that grid itself divided into 9 square grids of 3 by 3.

You can't just add any numbers, though. There are rules that making solving the puzzle challenging.

A number can only occur once in a row, column, or square.

To solve a Sudoku, look for open spaces where its row, column and square already have enough other numbers filled in to tell you the correct value. The more squares you fill in, the easier the puzzle is to finish!

Cryptogram Puzzles

BUTTERFLY CRYPTOGRAM PUZZLES

MIGRATING

Monarch butterflies have a long migration trip every year. They journey from the Great Lakes to the Gulf of Mexico, about two thousand miles, and return to the north again in the spring. That reminds me of the old joke: I just flew in from Mexico and boy are my arms tired.

SPECIES

There are more than twenty-four thousand species of butterflies, but moths are even more numerous. There are about one hundred and forty thousand species of moths known to exist in the world. The only continent where no butterflies live is Antarctica. I wouldn't want to live there either.

BIOLOGY

Butterflies are insects with a head, a thorax, and an abdomen, two antennae on the head and a long curled proboscis. The antennae are not for feeling, they are for smelling. They feed on the nectar from flower heads. They uncurl their proboscis so they can suck the nectar through it.

FISH CRYPTOGRAM PUZZLES

GENERAL FISH INFO

Fish are aquatic cold-blooded animals, covered with scales and have two pairs of fins and several unpaired fins. There are both fresh water and salt water species of fish. They can live in high mountain streams and deep in the ocean.

AN ANCIENT FISH

The dunkleosteus was a huge prehistoric fish that grew up to thirty-three feet long and weighed almost four tons. This hunter lived about three hundred and sixty million years ago and had few rivals.

THE END

As of two thousand and six there were over one thousand species of fish being threatened with extinction. Some causes include overfishing, destruction of habitat and introduction of competition into the habitat.

DRAGON CRYPTOGRAM PUZZLES

GENERAL DESCRIPTION

Dragons are enormous, fierce, fire breathing and bloodthirsty fictional creatures that appear in fairy tales and legends. The main function of the dragon in these tales are for a knight to show off his bravery by challenging the dragon. In Europe they are regarded as evil creatures, while in Asia they are considered friendly creatures.

PHYSICAL DESCRIPTION

Dragons are described as winged lizardlike creatures that can breathe fire and have a long scaly tale. Those who believe that dragons were real say that the wings were massive in order to create lift for flight and dragon bones were hollow to make them lighter, like birds.

COLORS

According to myths, legends, fairy tales and stories, dragons can be many different colors. Different character traits are matched to the different colors they can be. Dragons are typically thought to be either black, red, blue, green or white.

ALIEN CRYPTOGRAM PUZZLES

ALIENS IN THE UNIVERSE

Since there are billions and billions of stars in the universe it is likely that there are other planets like earth that can sustain life. But, it is very unlikely that we would ever actually meet aliens due to the vast distance of space.

HOW DO THEY LOOK?

Aliens are usually described as being short with large eyes, large heads, long arms and grey or green skin. Apart from that, they are usually said to have a human-like form with two arms, two legs, hands, feet, and so on.

A FAMOUS CRASH

It is thought that there was an alien spaceship that crashed near Roswell, New Mexico, in the forties. The United States military claimed that the debris was actually from a weather balloon that crashed.
